This one-off cutter is designed and built for long journeys at sea. But since the keel can be lifted (from 3 to 1.15 metres) drying out or navigating shallow waterways is also possible. The beautiful clean lines of the hull really stand out and have received spontaneous praise from many admirers. The robustness of this ship shows in every detail, from the wood-core glass-fiber reinforced hull to the solid wood interior that is both cosy and functional. The vessel is fully equipped. It performs very well under all conditions and the doghouse is able to withstand severe weather conditions. For further information and viewings, please contact: Paul Rimmelzwaan 0031 (0)657332267
