The classic Pettersson is a boat for true enthusiasts. Work can be expected on every boat of this age. That is no different with this Pettersson but the basis is good. In addition, this boat has an efficient Vetus engine from 2011 with only 45 engine hours. This special model is built from oak with the planks laid over. The underwater ship is equipped with epoxy. The deck is in good condition but the paint needs attention. The boat is inside a hall and can be viewed by appointment.
